Born in 1988 in France,
Living in Hà Nội

Thomas Leperou

SOFTWARE ENGINEER

Entrepreneur and problem-solver,

client oriented full-stack software developer,
traveler and good cooker

FEATURES

Software engineering, project management, full-stack JS development, CRM, Atlassian services, distributed architecture, UX & webdesigner, Linux server.

DIPLOMA

Master degree in Information and Computer science

2012 · ESGI, Paris

Manage information system and design business processes. Focus on project management, change management, Business Intelligence and BPML.

HIGHLIGHT

Secured dematerialization system of certified documents

2016/17 · COGEPRINT, printer and router of certified & confidential documents

Architecture: A distributed full stack JS software and a RAID 10 storage

Usage: 15 000 users, B2B & B2C; to banks, lessors and more.

Missions: Manage and develop the project through all stages of its life cycle

1. Translate business processes and client requirements into engineering solutions
 2. Architect a secured solution, from storage to transport to the granted reader
 3. Estimate tasks and budget. Negotiate scope, price, and schedule projects
 4. Lead developments within an Agile method; coach and mentor juniors; set-up the workflow & documentation of development, testing, and exploitation processes
 5. Set-up and drive Atlassian Bitbucket, JIRA and Confluence for 15 people
- Manage problem-solving on client and development issues.

Technos: Debian, CentOS, Nginx, MongoDB, Redis, NodeJS, SailsJS, KueJS, EmberJS, Foundation

EXPERIENCES

Front-end developer **GemsoftVN · Software outsourcing company**

Dec 16 / Mar 17 · Hà Nội

Develop in JS with ReactJS/Flux an innovative web learning platform. Integrate a team of 6 talented Vietnamese developers and interface with the Client from the USA.

Full-stack software engineer **LST Media · Software engineering company**

2014 / 17 · Clermont-Ferrand

Assist a printer company in its digital transformation and create a new business unit of a materialized & certified documents service, from the concept to the software (see Highlight above).

Develop a social platform with Drupal and Foundation on behalf of Real Estate. Agencies follow users activities and interact with them in a Facebook-style.

Create communication services based on Drupal 7 for small companies in France. Develop and host Web sites. Develop a network of freelancers in order to sell and implement those services. Manage and coach them within business and engineering issues.

Consulting on pre-sale phase and POC, for Ionic Application, Drupal Commerce, WooCommerce and entrepreneur projects.

Project manager **Listo · Innovative digital company**

2011 / 14 · Clermont-Ferrand

Create an innovative embedded digital signage solution, remotely manageable via GSM/UMTS networks (M2M) using NodeJS as backend and JS as frontend.

As the CEO and CTO of the company, I negotiated with banks, clients, and providers. I mentored and managed juniors.

Project manager **First Group · Training consulting company**

2011 / 12 · Paris 8

Manage the IT application and the asset landscape: ~15 employees, 250 trainers. Lead the web customers acquiring strategy, develop and host the Website. Outsource the IS management: audit, specify, find the provider & manage changes. Handle the moving out/in of the IT. Manage problem resolving.

Web developer **Renee Costes Viager · Real Estate**

2010 / 11 · Paris 12

Develop the in-house ERP backend; lead the frontend development; and worked on the outsourcing of the ERP's development.

Ubuntu, Apache 2, MySQL 5, ZendFramework, PHP 5, ExtJS 3
